Kirami Floating thermometers

WEIGHT:	0.98 kg
PRODUCT LENGTH:	8 cm
PRODUCT WIDTH:	12 cm
PRODUCT HEIGHT:	25 cm

6430036753085

A thermometer makes it easy to monitor your hot tub's water temperature during heating. For accurate measurements, the water should be stirred during heating, with a Kirami mixing paddle, for example. During bathing, a thermometer also allows you to easily see when you should add some more firewood to the heater.

Kirami's playful goldfish thermometers are both fun and functional, delighting bathers and providing accurate water temperature measurements. A thermometer makes it easy to monitor your hot tub's water temperature during heating. For accurate measurements, the water should be stirred during heating, with a Kirami mixing paddle, for example. During bathing, a thermometer also allows you to easily see when you should add some more firewood to the heater. The goldfish thermometer is sure delight both children and the young at heart. The built-in string allows you to anchor the thermometer if you do not want it floating freely.
