Kirami Ash boxes

WEIGHT:	1.7 kg

6430036754297

A heater ash box is an excellent accessory for your hot tub. Emptying the heater’s ash compartment is easy when the combustion waste accumulated in the firebox can be dropped into an ash box through the grate hole. The ash box allows the combustion waste to be easily and quickly removed without shovelling: simply remove the box from the ash compartment and dispose of the waste appropriately. Made of acid-proof stainless steel, the ash box boasts excellent heat and rust resistance.

This ash box is compatible with CULT and MACU heaters as well as the new CUBE heater from the spring 2018 model onwards.
