Kirami Chimney kits

WEIGHT:	4.4 kg

6430036759193

Kirami heaters can be equipped with a range of chimneys made from acid-proof stainless steel, with a diameter of 120 or 150 mm. Our range of chimneys includes ready-made sets, individual spare parts and a variety of extension pipes. Straight extension pipes allow you to conduct smoke away from the hot tub more effectively for a smoke-free bathing experience. Meanwhile adjustable corner pieces, with a range of either 0–30 or 0–90 degrees, make it easier to build optimal chimney solutions for difficult spots, such as when your hot tub is located under a roof or near a wall. A chimney should always be topped with a suitable stainless steel chimney cap, which also helps eliminate sparks. The heat protector around the chimney improves safety and protects against burns.
Our high-quality factory-made pipes are made out of acid-proof stainless steel. The set is compatible with SUB LT and CULT heaters that have a 120 mm diameter chimney connection. The set contains all the basic parts of the chimney.

Set contains:

- 1 x 1m chimney pipe
- 1 x 0.5m chimney pipe
- 1 x 1m heat protection shield
- 1 x hat
