Designed for Family hot tubs, these 71-cm high steps are equipped with an 85-cm high handrail for convenient support. The steps are sturdy and cover an area large enough that you can easily leave your slippers on them while soaking in the hot tub, for example. The steps are also designed to serve as a cover for the hot tub's filter, protecting it from the weather and hiding it from sight.

The heat-treated pine used in the outer shell is a Finnish alternative for dark-coloured imported wood. ThermoWood is a high-quality, long-lasting material with a warm brown colour that maintains its shape well.
