Cartridge filter for filtering pool water. It is important to take care of water hygiene in pools. And the physical part can be taken care with a cartidge filter. This filter is based on using a fiber based cartidge for filtering the pool water. It works by the pump moving the water through the cartidge walls from outside to inside. It can be used in small swimming pools and hot tubs. On top of physical filtering it is important to use chemicals in the water to keep bakteria and viruses under control.

CF23 is an external cartridge filter system suited for Kirami hot tubs and filters bathing water efficiently. It is built as one piece where the integrated pump is below and the cartidge tank are turn connector are on the top. The suction side has a coarse prefilter for bigger carbage that protects the pump. The filtration are is 2,3m2 and the cartridge can be washed and rinsed by running water. The cartidge can also be reapcled with a new one when in needed.

The system nedds to be connected to the hot tub with optional wall through/ hose kit, that is sold separately. The system has hose connectros for 38mm inside diameter hoses. The device must allways be connected to a RCD protected power socket.
