Kirami Lead-through set to replace wood fired heater for plastic hot tubs

WEIGHT:	5.1 kg

Lead-through set for plastic hot tubs without wood fired heater is used when filter unit is connected to a Kirami hot tub instead of wood fired heater. That means situations were the heater is replaced with a system meant for filtration and / or heating that circulates the water in the tub. This kit makes i possible to have the required two suction outlets inside the tub and one return inlet for the circulating water. The kit includes parts that makes the hose connection possible for 38mm inside diameter hoses for the input and output.

The lead-through series of hot tubs without wood fired heater includes the following parts.

Parts to replace heater lead-throughs:

- Lead-through
- 4 pcs Hose clamp 32-50mm
- 2 pcs rubber hose 10cm 75mm inner dimension
