Kirami FinVision® -outdoor saunas show the high-class finish of a master craftsman

The already surface-treated Kirami FinVision® -sauna M Misty is made of heat-treated panels and heat-treated softwood. The outdoor sauna has a modern interior. The dark colour and scent of the heat-treated aspen create a gentle and inviting atmosphere. The clear and simple style is suitable for any garden. Thanks to the large glass elements, you can always enjoy the feeling of being close to nature. We are sure that even those who are not used to the outdoor sauna at all will become sauna enthusiasts once they get into the sauna mood. We believe that the otdoor sauna will become one of the most popular places in your garden.

The sauna is roomy yet compact. The surface area of the sauna is 5.2 m² and the building is roughly 2.55 metres tall. The outdoor sauna has been designed for 4–6 people, which makes it perfect for both small and large groups.

**We reserve the right to material changes, if the raw material prices and/or availability of the products change significantly during the validity period. We try to keep the quality of the material at least the same as the original, despite the change of material.*

The outdoor sauna is delivered fully assembled

The Misty -sauna is the perfect solution for a hectic everyday life. The outdoor sauna is delivered fully assembled. The roof is also complete. Kirami FinVision® Misty -saunas are always insulated, which helps to ensure that the sauna heats up quickly and keeps the heat in. This makes the outdoor sauna suitable also for colder areas.

The benches made of heat-treated softwood (* aspen) and the interior surfaces of the sauna are eye-catching. The benches are easy to lift up for cleaning and maintenance. The large window gives the outdoor sauna a more spacious feel. The double-glazed window made from grey, tempered, selective glass also improves the sauna’s energy efficiency, and the argon gas between the panes acts as an insulator. The panoramic window has a dark tint, which gives a wonderful balance and gentle feeling to the beautiful view.

The glass door is equipped with a sturdy roller latch, which allows the door to open and close smoothly and stay shut. The glass in the door is a double-glazed, tempered glass element. The door handle is designed to complement the modern style of the sauna and fit your hand perfectly.

As a standard the door is on the right side of the sauna and it opens up right-handed.

The outer shell of the sauna is a sleek, heat-treated softwood (* spruce) panel. The heat treatment improves the wood's resistance the rot and reduces the shrinking and swelling of the wood, when moist. The stylish and deep black, surface-treated thermowood is durable and the paint protects the wood from dirt and UV radiation. This easy-to-care and recyclable panel material completes the sauna with a modern and stylish look. The interior surfaces of the sauna are made of heat-treated softwood (* aspen). The sauna‘s dim atmosphere helps you relax both physically and mentally. Just let your thoughts flow!

Harvia Virta Combi 10,8kW combined electric heater and steamer (Black). Harvia Virta Combi is a stylish and versatile combination of an electric heater and steamer that has its own place for sauna fragrances. The Combi heater is the right choice for those who enjoy soft and humid steam and the atmosphere created by fragrances. The heater can also be used as a regular electric heater without steam. This "plug and play" sauna has all the electrical connections already made. This means that you can get into the sauna quickly and without any installation work. The LED lights underneath the lower bench and at the top of the backrest, which can be adjusted via the stove control panel, create a cosy atmosphere in the sauna. Kirami FinVision® -sauna has LED lights connected to the same Fenix control panel you use to control the heater. Stone amount: 70kgSize of stones: 10-15cm
