What would a Kirami FinVision® -lounge be without the relaxing sofa set that fits the style. Tailor-made to fit the Kirami FinVision® -lounge.

This set includes a sofa and ottoman with covers and a tray, which is made to fit the dimensions of the ottoman. The frames of this stylish set are made of heat-treated solid wood, surface-treated with paraffin oil. All three parts of the set are pre-assembled, ready to use.

Want to stand out and add some colour to your lounge with an orange sofa and ottoman? The lovely orange colour brings warmth and you will definitely create a cheerful and attractive environment in the lounge, regardless of the season, and we are sure you and your company will not want to leave.

The fabric of the sofa is also suitable for outdoor use thanks to its waterproofing, UV and mold protection. The sofa fabric is protected with a dirt-repellent Teflon treatment, providing excellent protection when you come from the sauna to dry. The sofa's seat cushion serves as a sleeping place and the four large and soft back cushions invite you to lean on them. For complete relaxation, it's a good idea to put your feet up on the ottoman from time to time, or alternatively use the ottoman as a table, together with the tray that comes with the ottoman. The sturdy tray stays in place on the ottoman, even with your treats on it, and can be removed if necessary. The soft parts of the ottoman are covered with the same orange fabric as the sofa, and the tray is made of heat-treated solid wood, just like the frame of the sofa and the ottoman. All parts of the set match each other seamlessly in style with an eye-catching design, making the Kirami FinVision® -lounge even more comfortable.
