Kirami Kirami FinVision® -outdoor shower Misty

WEIGHT:	70 kg
PRODUCT LENGTH:	103,3 cm
PRODUCT WIDTH:	70 cm
PRODUCT HEIGHT:	203,2 cm

Before and after taking a sauna, it's lovely to take a refreshing shower. That's why we designed an outdoor shower matching the style of the Kirami FinVision® Misty module series. The shower keeps you fresh and helps to keep the sauna, the hot tub and the cool down areas clean. The outdoor shower blends in perfectly with the Annex modules. It is sized to fit the terrace modules, but can also be installed next to your swimming pool, for example.

With Kirami FinVision® Annex modules, you can create a seamlessly compatible ensemble and the backyard of your dreams.

KiramiFinVision® -outdoor shower Misty is a module made of heat-treated pine. The preassembled, straight-line module is designed for installation on the Kirami FinVision® -terrace and is compatible with the various Annex modules. The shower module consists of a single wall, side shelves between the inner and outer walls, a shower floor and a shower. The high quality stainless steel shower is pre-mounted in place on the shower wall. The shower is equipped with pre-assembled connections, which can be connected to both hot and cold water pipes or, alternatively, to a garden hose. The floor grating of the shower is removable. Under the grating there is a trough made of galvanised sheet metal, which leads the wash water to the drainage pipe. A 50 mm drainage outlet for wash water is included in the base.

If you order the shower with the terrace, the outdoor shower module is pre-fitted to the terrace. The shower wall can also be installed afterwards, in which case it is supplied in two parts.
