The Original product range's Breezy truly is an easy-care product with inside plastic. This enduring model is suitable for all purposes, making it a good choice for any situation. Its size makes Breezy M suitable for the average family, or why not a get-together with a small group of friends! As additional equipment LED-lightning is an option that highlights the plastic’s colour. Factory fitted LED-lighting creates a fabulous atmosphere in the evening twilight.

The air-source heat pump is a complete system that includes cooling and heating functions, a circulating water pump, a filter, ozone purification, and a control panel. The device has a heat transfer capacity of approximately 4–5 kW, and the filter operates whenever the device is on. The estimated cooling or heating time is about 8 °C per hour in S-sized tubs, while in larger M-sized tubs, it is 4–5 °C per hour.

The heat-treated pine used in the outer shell is a Finnish alternative for dark-coloured imported wood. ThermoWood is a high-quality, long-lasting material with a warm brown colour that maintains its shape well. Light gray is velvety smooth and delicate dotted inside colour. The soft, vibrant grey of the interior is always timeless and elegant, and it blends in beautifully with the environment.

The barrel diameter is 170 cm and water volume 1540 litres. It is suitable for 4-6 people. The dry weight of the hot tub is 138 kg. The gross heat output of the Dual stove is 5 kW and the net heat output transferred to the water is 5 kW.
