Thermowood

WEIGHT:	125 kg
PRODUCT LENGTH:	230 cm
PRODUCT WIDTH:	221,8 cm
PRODUCT HEIGHT:	18,6 cm
OUTER COLOR :	Thermowood

Are you thinking about building a terrace or could ready-made patio modules be the alternative?

With ready-made patio modules, it is possible to extend your terrace area in a simple and efficient way. For example, you can place a hot tub, a sofa and a barbecue on the patio. This allows you to move from one place to another with clean feet and also makes it easier to maintain the entire outdoor deck area, leaving more time for relaxation.

Ready-made patio modules

The Kirami FinVision® Misty family also includes ready-made patio modules that you can easily mount in front of or behind other Misty modules or place separately in a location of your choice. To make the combination with the other Kirami FinVision® Misty modules as easy as possible and to achieve an optimal overall appearance, the outdoor patio modules have the same dimensions as the other Kirami FinVision® Misty modules.

Design your own Kirami FinVision® Annex ensemble by considering your needs and preferences!

Pre-assembled patio module size M

The decking boards of the M-size patio are made of heat-treated *pine, the frame of the patio is made of *spruce and the lower supports are made of larch, which is more resistant to moisture. The module is a pre-assembled, ready-to-install element. This M-size patio fits in front of or behind all Misty M-size modules, such as: sauna M, lounge M, terrace M or pergola M. Please note that two M-size patio modules fit in front of one Lounge XL module.

*We reserve the right to material changes, if the raw material prices and/or availability of the products change significantly during the validity period. We try to keep the quality of the material at least the same as the original, despite the change of material.
