Kirami Kirami FinVision® -pergola Misty

TW Deep Black Annex

WEIGHT:	210 kg
PRODUCT LENGTH:	235 cm
PRODUCT WIDTH:	221,8 cm
PRODUCT HEIGHT:	250 cm
OUTER COLOR :	TW Deep Black Annex

The Kirami FinVision® -pergola in the Misty range is a complete module that is easy to attach to other Misty buildings. The pergola can be installed between a sauna, a changing room, a lounge or a terrace. Alternatively, the pergola can also be attached to other modules as an extension or placed in front of other modules to create a pleasant area for cooling down. The third option is to buy the pergola as a stand-alone module for use as a sheltered patio for sunbathing, for example. The modules come in two sizes.

See also our privacy screens, which are sold as accessories.

The pergola creates new dimensions for the Kirami FinVision® Annex

The pergola lightens up the Kirami FinVision® Annex and gives it more dimension, exactly as you wish. The pergola also allows you to design an L-shaped ensemble. Only your imagination, preferences and yard are the limit when planning the pergola’s placement and connection with other Kirami FinVision® modules. Create the perfect combination for you!

Structure and materials

The pergola consists of a ready assembled base, on top of which the posts, beams and rafters are installed according to the instructions provided. The floor of the pergola is made of heat-treated pine, making the structure look uniform and light. The other external surfaces are made of spruce with a black finish. The screw connections on the pergola’s posts allow the pergola to be easily connected to other Misty modules in various ways.

This larger pergola is a superb addition to the other Misty modules. The pergola can also be used as a stand-alone module – for example, you can use it as a more sheltered resting area or outdoor kitchen. The larger pergola has room for a sofa, a dipping tub or an electric hot tub, for example. Protect your pergola with a Kirami FinVision® -privacy screen and vines, and decorate with hanging lights.

Assembling the product

The pergola is assembled on a flat surface. The module does not have to be connected to other buildings, if that is your preference.

You can also connect the larger pergola to one or more M-sized or S-sized pergolas if you want to make the space a little bigger, for example.
