INNER COLOR :	LDPE-LightGray

Kirami Premium Twinny - a twin-basin hot tub that redefines bathing

Kirami Premium Twinny is Kirami's latest innovation in the world of hot tubs.

Twinny is a hot tub that offers you new ways to enjoy bathing. It's a space-saving hot tub with a small water capacity.

Hot and cold baths conveniently in the same hot tub

Twinny is a hot tub with two basins, which allows various types of hot and cold baths in a compact format. You can choose whether you want to take a bath in a cold, warm or hot basin. You can move from one basin to another easily and hygienically, as they are in one unit. Twinny makes hot and cold therapy easy and enjoyable.

The twin-basin hot tub is not only versatile, but also stylish

The basin/hot tub is designed to suit a wide range of uses and environments. It is an ideal choice for service providers such as physiotherapists, rehabilitation centres and sports clubs, as well as for home users. You can place Twinny in your yard, on your terrace or even at your cottage and enjoy a relaxing bath.

Order your Kirami Premium Twinny now and experience a new dimension of bathing!

The hot tub is heated by two of Kirami's Dual electric heaters. Each basin has its own unit. The heaters are efficient and easy to use, and heat the pool water in about 24 hours. An air source heat pump is a smart unit consisting of a cooling and heating function, a circulator pump, a filter and a control panel. The total power of the unit is about 5 kW. The filter always works when the unit is on. The reference heating or cooling time is about 1°C/hour for M-size basins, while for small basins it is 2-3°C/hour. The net power transferred to the water by the air source heat pump is currently 5 kw

The heat-treated pine used in the outer shell is a Finnish alternative for dark-coloured imported wood. ThermoWood is a high-quality, long-lasting material with a warm brown colour that maintains its shape well. Light gray is velvety smooth and delicate dotted inside colour. The soft, vibrant grey of the interior is always timeless and elegant, and it blends in beautifully with the environment.

The barrel diameter is 200 cm and water volume 1230 litres. It is suitable for 2-4 people. The dry weight of the hot tub is 142 kg. The gross heat output of the 2xDual stove is 5 kW and the net heat output transferred to the water is 5 kW.
