Cold - hot contrast – with Kirami tubs

A quick dip in a refreshing cold tub or a soothing moment in warm water—whichever suits you best, or maybe you enjoy both?

These tubs are ideal for athletes who benefit from hot-cold therapy, avid winter swimmers, or those getting accustomed to cold water.

Our BlackIce S model from the Comfort collection is a rectangular tub with an exterior clad in the same UV- and weather-resistant material as the insulating cover. We recommend purchasing the optional insulating cover for a complete package.

This fully insulated plastic tub is low-maintenance, and its light weight and compact size make it easy to install, even on small patios and terraces. Perfectly suited for one-person use.

A tub without or with an air-source heat pump

The tub is available in two versions: either as a standalone tub without an air-source heat pump or as a tub with an air-source heat pump and a filter.The standalone tub comes with internal fittings prepared for later installation, while the exterior remains intact. If you choose to add a heat pump later, exterior fittings can easily be completed according to the instructions.

The tub has a heat pump and a filter is fully outfitted with fittings, allowing the equipment to be installed using a plug-and-play method.

Accessory options: include a custom insulation cover specifically designed for the tub; a BlackIce S insulation cover and a matching step set

No heater.

The exterior is stylishly coated with a UV and weather-resistant synthetic leather. The inner surface is made of dark gray, easy-care plastic. The timeless and trendy gray color blends seamlessly into various outdoor spaces.

The barrel diameter is xx cm and water volume 500 litres. It is suitable for 1 people. The dry weight of the hot tub is 42 kg.
