OUTER COLOR :	Pine-Outside
INNER COLOR :	Pine-Inside

Ready-to-use and nature-inspired sauna with a panorama window

The pre-assembled Kirami FinVision® -sauna M Dawn is a ready-to-use outdoor sauna for 4–6 people.

Imagine a sauna session where a large, full-front window opens directly to nature, your garden, terrace, or the stunning view of your home or cottage. Welcome to a place that invites you to enjoy and relax—where everyday worries fade away and peace takes over. This is your beloved spot where relaxation reaches a new level.

The sauna is compact but feels spacious. The surface area of the sauna is 4.8 m² and the building is roughly 2.51 metres tall. Designed for 4–6 people, it is perfect for both small and larger groups.

High-Quality and Durable Finnish Craftsmanship

The sauna's interior is traditionally classic. The scent of wood and the warmth of the heater invite you to relaxing sauna sessions. It features simple, timeless fixed benches made of heat-treated wood, which are easy to clean and maintain by moving the stool in front of them. The heat-treated wood benches can be treated with wax or oil. Heat-treated surfaces protect the wood from moisture and dirt.

The sauna's walls and ceiling are insulated, and argon gas between the double-glazed windows enhances the insulation. You can enjoy the warmth of the sauna in any weather. The finished, pre-installed sheet metal roof provides excellent protection for the sauna.

Safe and Beautiful Sauna Door

The sauna door always opens outward. The glass door of the outdoor sauna features a sturdy, non-locking roller latch, ensuring the door opens and closes smoothly and remains securely shut. According to Finnish safety regulations, the sauna door must not be lockable to allow for easy exit if necessary. There is a padlock outside the door, recommended for use when the sauna is not in use. The black door handle is designed to complement the classic style of the sauna and fit comfortably in your hand.

**We reserve the right to material changes, if the raw material prices and/or availability of the products change significantly during the validity period. We try to keep the quality of the material at least the same as the original, despite the change of material.*

As a standard the door is on the right side of the sauna and it opens up right-handed.

The sauna's exterior cladding is made of weather-resistant, heat-treated pine paneling. The surface of the finished outdoor sauna's exterior cladding can be left as it is. Over time, the exterior will gracefully age to a beautiful gray if left untreated. Alternatively, the outer shell can be painted in any desired color to match your yard’s aesthetic, such as the traditional Scandinavian red-black coastal style. Heat-treated improves the wood's rot resistance and reduces moisture-related movement. The interior surfaces of the sauna are made of (*pine), which can be treated with suitable sauna protection products or wax for interior use. The dim atmosphere in the sauna helps relax the mind and muscles, allowing thoughts to come and go peacefully during the sauna session.

Electric sauna heater Harvia Spirit SP90E 9,0 kW (Black). Designed and manufactured in Finland, the high-quality design heater is a Harvia masterpiece, combining an excellent sauna experience with safety and reliability. The heater’s structure protects the sauna structures and creates an even temperature thanks to unique and discrete ventilation ducts. The ducts cool the wall structures and improve the flow of air through the heating elements, creating an even heat in the sauna. The curved forms of the Harvia Spirit electric sauna heater exude natural design. The heater’s design highlights the round stones, creating a modern but elegant atmosphere with a gentle steam. This "plug and play" sauna has all the electrical connections already made. This means that you can get into the sauna quickly and without any installation work. Atmosphere in the sauna is enhanced by the LED lighting, adjustable via the heater control panel, located at the front edge of the upper and lower benches. Kirami FinVision® -sauna has LED lights connected to the same Fenix control panel you use to control the heater. Stone amount: 55 kg. Size of stones: Round Olivine Diabase Sauna Stones, 5–10 cm.
