PRODUCT WIDTH:	149,2 cm
PRODUCT HEIGHT:	255 cm
HEATER :	Harvia m3
OUTER COLOR :	TW Deep Black Annex
INNER COLOR :	Thermotreated Aspen

Kirami FinVision® -saunas have the high-class finish of a master craftsman

The outer shell and the interior of the sauna is modern and similar in style to other Kirami FinVision® Misty modules. The clean and simple style is particularly suitable for small yards or patios. The large glass surfaces of the sauna give a sense of space and airiness, while also allowing you to feel closer to nature.

The basic structure of the sauna is the same size as the Kirami FinVision® -changing room and the Kirami FinVision® -terrace S. These three Annex modules together create a smart, compact unit for your yard. The S-sized Misty sauna can also be combined with larger Misty modules, as the modules fit together seamlessly regardless of size.

The sauna is compact in size. The surface area of the sauna is 3.4 m² and the building is roughly 2.55 metres tall. The sauna is designed for four people, which makes it perfect for small groups.

The Misty sauna is the perfect solution for a hectic everyday life

The sauna is delivered fully assembled. The roof is also complete. Kirami FinVision® Misty saunas are always insulated, which helps to ensure that the sauna heats up quickly and keeps the heat in. This makes the sauna suitable for colder areas, too.

The benches made of heat-treated softwood (* aspen) and the interior surfaces of the sauna are eye-catching. The benches are easy to lift for cleaning and maintenance. The double-glazed window made from grey, tempered, selective glass also improves the sauna's energy efficiency, and the argon gas between the panes acts as an insulator. The panoramic window has a dark tint, which gives a wonderful balance and gentle feeling to the beautiful view.

The glass door is equipped with a sturdy roller latch, which allows the door to open and close smoothly and stay shut. The glass in the door is a double-glazed, tempered glass element. The door handle is designed to complement the modern style of the sauna and fit your hand perfectly.

Sauna bathing improves your quality of life. The dim atmosphere of the sauna and a drop of your favourite sauna fragrance will relax your mind and muscles.

**We reserve the right to material changes, if the raw material prices and/or availability of the products change significantly during the validity period. We try to keep the quality of the material at least the same as the original, despite the change of material.*

As a standard the door is on the right side of the sauna and it opens up right-handed.

The outer shell of the sauna is a sleek, heat-treated softwood (* spruce) panel. The heat treatment improves the wood's resistance to rot and reduces the shrinking and swelling of the wood, when moist. The stylish and deep black, surface-treated thermowood is durable and the paint protects the wood from dirt and UV radiation. This easy-to-care and recyclable panel material completes the sauna with a modern and stylish look. The interior surfaces of the sauna are made of heat-treated softwood (* aspen). The sauna's dim atmosphere helps you relax both physically and mentally. Just let your thoughts flow!

Harvia wood burning heater M3 16.5 kW black. Harvia M3 with its classically elegant, eye-catching design is suitable for a small wood-fired sauna. The heater's constant warmth and efficient fire and air circulation ensure a pleasant, relaxing sauna experience. The Harvia M3 heater is equipped with a glass door through which the blazing fire creates the atmosphere of a traditional sauna. The graphite-black heater with a shiny stainless steel cover at the top and a firebox at the bottom is a true classic right from the moment it is heated up. The chimney and the heater itself are delivered in separate packages and installed on site in the sauna. The delivery of the chimney and heater includes the following products: Harvia M3 black wood burning sauna heater, Harvia black steel chimney (WHP1500) with a total length of 2400 mm, Harvia spark protection plate, stones for the heater and Legend 240 floor protection pad and U-shaped protective wall around the heater. Quantity of stones for the stove: 2 boxes of small stones, 30 kg, (Ø10-15 cm).
