PRODUCT LENGTH:	131,2 cm
PRODUCT WIDTH:	90,5 cm
PRODUCT HEIGHT:	105,7 cm
HEATER :	Dual heatpump
OUTER COLOR :	TW Deep Black HotTub
INNER COLOR :	Gray

Refresh in the cool and relax in the warm tub!

Step out of the warmth of the sauna into a tub beside it, where the touch of cold water on your skin awakens every sense and helps you recover from a busy day. Alternatively, you can treat yourself to a wonderfully warm and relaxing bath. Either way is possible, as the Premium NordIce S tub is equipped with the Dualex air-source heat pump, which cools the tub water and also includes a heating option.

Premium Tub – a complete package

Our Premium range, the NordicIce S Dualex, is a rectangular tub that is panel-clad on the outside. This fully insulated tub, equipped with a plastic inner shell, features a bench sculpted from gray stone at one end. The bench stays securely in place on the bottom of the tub, thanks to the weight of two stone legs and the bench itself. The bench is primarily gray, though the stone shade may vary. The light weight and size of the tub make it easy to install in small yards or on terraces. The tub is suitable for one user and can be installed using a plug-and-play method.

Optional Accessory: An insulation cover specifically designed for the tub; the NordicIce S insulation cover and a step set.

The air-source heat pump is a complete system that includes cooling and heating functions, a circulating water pump, a filter, ozone purification, and a control panel. The device has a heat transfer capacity of approximately 4–5 kW, and the filter operates whenever the device is on. The estimated cooling or heating time is about 8 °C per hour in S-sized tubs, while in larger M-sized tubs, it is 4–5 °C per hour.

The outer shell is made out of sleek panels made of heat-treated softwood. The heat treatment improves the wood's resistance to rot and reduces the shrinking and swelling of the wood, when moist. The stylish deep black, surface-treated thermo wood is durable and the paint protects the wood from dirt and UV radiation. This easy-care and recyclable panel material is also used in the Kirami FinVision® Misty modules. The hot tub and sauna look great together thanks to their matching external cladding. The inner surface is made of dark gray, easy-care plastic. The timeless and trendy gray color blends seamlessly into various outdoor spaces.

The barrel diameter is xx cm and water volume 500 litres. It is suitable for 1 people. The dry weight of the hot tub is 100 kg. The gross heat output of the Dual stove is 1 kW and the net heat output transferred to the water is 2.3 kW.
